

MOBIZ INTERNATIONAL · EST. 2010 · GAMPAHA, SRI LANKA

Sri Lanka's #1 *Web Design Company* for the AI Age.

We build the websites, platforms and digital products that the country's most ambitious companies choose – *and keep* – for the long term. Web design, eCommerce, mobile apps, SEO and AI, delivered under one roof.

Mobiz International (Pvt)
Ltd.
Reg. PV101727 · mobiz.lk

We're an independent Sri Lankan studio that builds websites, online stores and apps *designed to keep working for years* — not quick projects that break after launch.

Mobiz builds commercial websites, eCommerce platforms, mobile apps and AI tooling for established companies in Sri Lanka and abroad. Our flagship work is hand-built in-house on our own Laravel CMS engine — and we build and maintain WordPress, Joomla and Magento too when a client asks, always advising the platform that serves the business best. Whatever the stack, the code is written by our own team, never resold, and the result is software that stays shipped: measured against an outcome, owned outright by the client, and warrantied for ten years.

| | | |

UNDER ONE ROOF

Six disciplines — web, commerce, mobile, SEO, marketing and AI — delivered by one in-house, senior-led team. No subcontractors.

FOR THE LONG TERM

A 10-year software warranty on every Laravel build, full source-code ownership, and multi-year partnerships measured in revenue, not deliverables.

Founded in Gampaha in 2010, on a *simple mission*.

We didn't start Mobiz to sell websites. We started it to be a partner in our clients' success – to sit on their side of the table and treat their growth as the brief. A website, a store, an app: to us these are never the deliverable. They are the means to an outcome the client actually cares about, and we hold ourselves responsible for that outcome.

Fifteen years on, that mission still decides everything. We stay privately held and profitable so no one but the client comes first. Every line of code is written by our own team in Sri Lanka, never outsourced or resold. And we measure ourselves the only way a partner should – by how many clients stay, and how far they get.

MADE IN
Gampaha, LK

*“Made in Gampaha, not outsourced.
Fifteen years of work that **stays shipped**.”*

Six principles we will say out loud *before we sign.*

01

Measured, not decorated

A website is accountable to a number. We report traffic and revenue, not page views.

02

Speed is a feature

Lighthouse 95+ and sub-2-second loads on 3G are design constraints, not afterthoughts.

03

Honest to a fault

We will tell you a brief is wrong before we take it. Published pricing; no surprises.

04

You own everything

Source code, data and domain are yours for life. Standard frameworks, no lock-in.

05

Local craft

Built in Sri Lanka by our own team, benchmarked to Baymard, WCAG and Core Web Vitals.

06

Built to last

Ten-year warranty, documented handover, and a relationship measured in years.

Six disciplines, *one* in-house team.

01

Web Design & Development

Custom, high-performance sites — Lighthouse 95+ baseline.

WHAT WE MAKE

Our hand-built *Laravel CMS*, ready to take your business to the next level.

Laravel is the engine we recommend and the one we've engineered around – a bespoke codebase you own, with no page-builders or plugin bloat. We also build WordPress, Joomla and Magento on request.

MOBIZ GUARANTEE

10-Year *Software Warranty*

Issued with every Laravel package. We stand behind the codebase stability, routing integrity, schema continuity and zero-plugin risk of what we build – in writing, for a decade.

THE WARRANTY COVERS

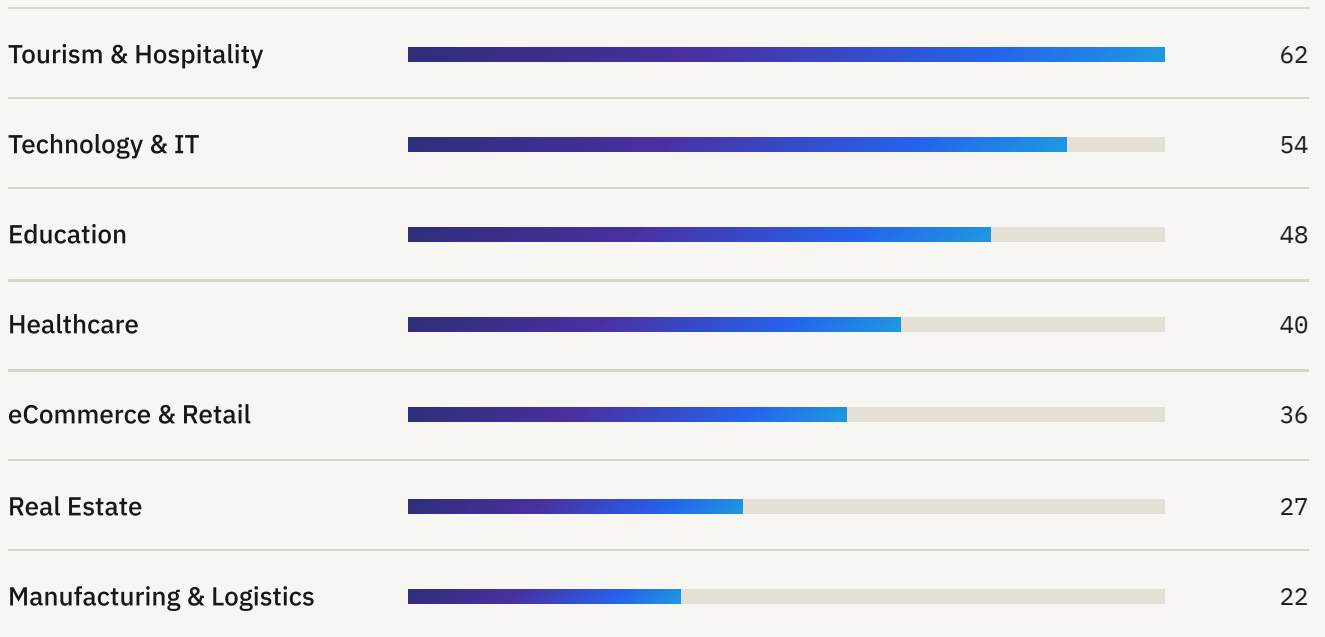

Codebase stability · routing integrity · schema continuity · zero-plugin risk. (Excludes external factors — provider outages or third-party API deprecation.)

YOU OWN EVERYTHING

Source code, data and domain — yours for life. Standard frameworks, documented codebases, handover-ready on day one. No proprietary lock-in.

Sector-specific playbooks, drawn from 500+ projects.

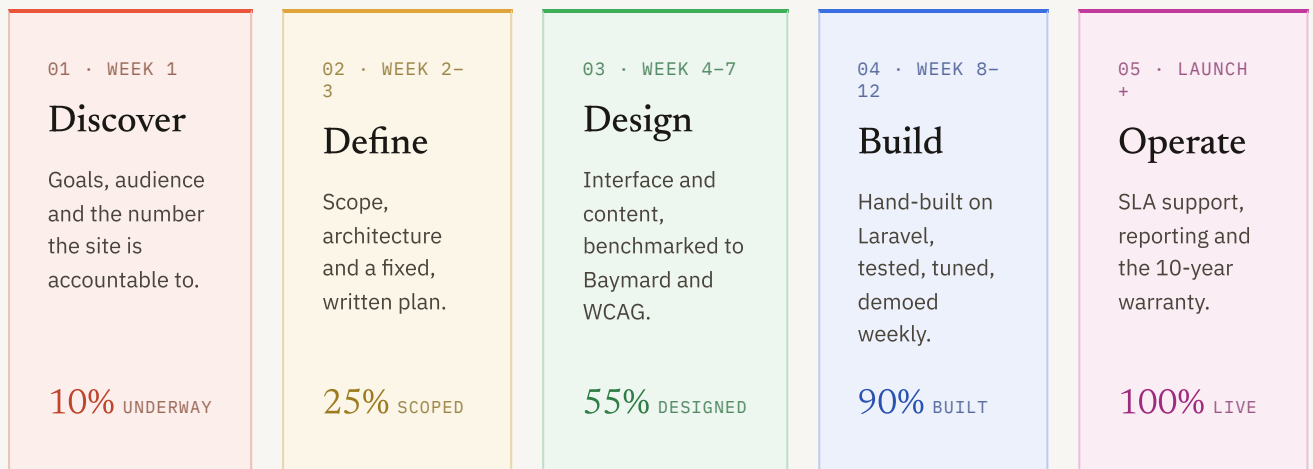

Bars show cumulative experience across our portfolio since 2010 — not separate project counts.

- Fashion & Beauty
- Finance
- Shipping & Freight
- Non-profit & Government

Five phases, weekly demos, *no surprises.*

A fixed-scope plan with milestones at every step. You see working software every week — not a status update.

AWARD BADGES

“Their expertise, support and attention to detail carried our e-commerce project from start to finish. We stayed because the work kept performing.”

Paul Walawe – Founder & MD,
Knuckles Valley Plantations

★★★★★

“Fast, responsive, and the site simply doesn't break. Exactly what was promised.”

COMMERCE CLIENT · COLOMBO

★★★★★

“They told us what not to build. That honesty saved the budget.”

EDUCATION CLIENT · OVERSEAS

A fixed-scope written quote, within *72 hours*.

No drawn-out discovery theatre. We scope it, price it, put it in writing — and you decide. NDAs are standard; we reply within a few hours.
